

Connecting Prevention Strategies Across Violence and Abuse

In 2016/2017, the Centers for Disease Control and Prevention (CDC) released a series of technical packages focused on preventing different forms of violence. These technical packages focus on preventing: **Intimate Partner Violence, Suicide, Youth Violence, Sexual Violence, and Child Abuse and Neglect**. The technical packages recommend research-based strategies to prevent the different forms of violence. All five technical packages share examples of prevention work that fit into five overlapping strategies. Regardless of which strategies we implement, the work overlaps and impacts the prevention of all five forms of violence. This handout looks at just some of those overlapping strategies to help us better identify how we can all work together.

Shared Strategies

Examples from the 5 CDC Technical Packages

- 1. Promote Social Norms that Protect Against Violence**
- 2. Teach Skills to Prevent Violence and Abuse**
- 3. Provide Opportunities to Empower and Support**
- 4. Create Protective Environments**
- 5. Support Victims/Survivors to Increase Safety and Lessen Harms**
